eMediaVA Single Sign-On
The key to solving at least one of your problems

New digital applications are changing the way we teach and learn but managing them can quickly become a burden for busy administrators and IT departments. eMediaVA now offers a way around the problem with its Single Sign-On/Single Log-In option.

Our custom integration is built on industry standard, secured auto-registration using either LDAP or SAML authentication. Once installed, there is no additional overhead in managing your accounts and no added work for end users to access their digital resources.

Let us take the work out of managing your digital repository and make it easy for your end-users to access the wealth of high-quality educational content available to them on eMediaVA.*

*SSO/SLO integration is available at a one-time cost of $4,500.00

Here is what Virginia educators are saying about eMediaVA:

" eMediaVA is user friendly and provides clear, concise results."

"The Search modules are easy to use and don't require much time to learn or manipulate. It makes the whole process better."

"The Search by Virginia SOL feature is especially helpful for anyone who is teaching in a new subject area and has not yet mastered what the standards are for their particular subject area."

" I love the idea of the grade selector. This is a super enhancement for folks teaching TAG or other accelerated content as well as folks instructing remedial or special education classes. It's fast, easy and intuitive."
